

Invasive plants are transported from other areas, establish themselves, and aggressively out-compete native vegetation.

BE ON THE LOOKOUT!!!

What do Aquatic **Invasive** plants do?

- **Impair** swimming, boating, and fishing
- **Form** dense mats of vegetation
- **Reduce** water quality
- **Decrease** habitat and biodiversity
- **Depress** property value

What can you do?

- **Remove** all aquatic plants from watercraft
- **Dispose** of plants away from the lake
- **Learn** to identify invasive plants
- **Lookout** for suspicious plants
- **Report** locations of invasive plants

Report any aquatic invasive plant sightings to the

Adirondack Park Invasive Plant Program
